

THALES AUSTRALIA & NEW ZEALAND

**Whenever critical decisions need to be made, Thales has a role to play.**

# THALES

## AUSTRALIA & NEW ZEALAND

### WHENEVER CRITICAL DECISIONS NEED TO BE MADE, THALES HAS A ROLE TO PLAY.

In a world that is increasingly mobile, interconnected and interdependent, the safety and security of citizens and nations, infrastructure and information depends on an individual's and organisation's ability to make the right decisions.

Around the world in the markets that Thales serves — defence, security, aerospace and transportation — these decisions are of critical importance.

Thales provides critical decision-makers, users and operators with the best tools, technologies and resources to gather process and distribute information, helping to interpret complex situations, to make better informed decisions leading to better actions and outcomes.

Thales's collaborative partnership philosophy and in-depth knowledge of the markets we serve drives the design and delivery of all of our solutions, and informs our innovations.

Our world-class technologies and the combined expertise of 67,000 employees, in 56 locally based country operations, make Thales a key player in assuring the security of citizens, infrastructure and nations.

### THALES AUSTRALIA AND NEW ZEALAND PROFILE

Thales is a major contributor to the Australian and New Zealand economies as a manufacturer, service provider and exporter, employer and developer of new, homegrown technologies and skills.

Contributing to Australia's and New Zealand's growth, national security and resilience, across the region Thales delivers strategically important industrial activities and assets.

- Thales employs 3,300 people at key sites across Australia and New Zealand, with 50% located in regional Australia
- Continuous investment in local research, development and innovation
- Established partnerships across industry, government and leading Australian universities
- Proud national partner of Legacy Australia, caring for the families of incapacitated and deceased veterans.

# ↘ TOGETHER. SMARTER. SAFER.

## THALES'S ROLE IN AUSTRALIA AND NEW ZEALAND

- ↘ Thales is the only company in Australia able to manufacture and support:
  - Protected vehicles: Bushmaster and Hawkei
  - Hi-tech underwater systems
  - Optronics and thermal imaging systems
  - Small arms.
- ↘ Australia's only in-country provider of Air Traffic Management (ATM) systems, supplying Australia's civil aviation customer, Airservices Australia
  - Proudly exporting advanced, Australian ATM capabilities and expertise to 50 countries — including Singapore, Taiwan, Thailand and South Africa — generating over A\$1 billion in exports.
- ↘ Delivering integrated, deployed and tactical secure IT communications systems and services for the Australian and New Zealand defence forces, national security agencies and critical industries
  - Thales's Next Generation Desktop enables multi level security and access protocols and reduces operational complexity and costs
  - Thales provides encryption solutions to Australia and New Zealand's largest banks and financial institutions.
- ↘ End-to-end operations of Australia's largest ship repair and maintenance facility at Garden Island in Sydney.

- ↘ Explosive ordnance and munitions manufacture, storage and distribution services for the Australian and New Zealand defence forces.
- ↘ Military training solutions, including simulation systems, on-site training services and operations.
- ↘ Ground transport systems focused on improving efficiency, increasing capacity on new and existing infrastructure, and enhancing the experience of public transport customers, including:
  - Auckland Transport HOP - the integrated ticketing program in Auckland, New Zealand
  - The onboard communications and surveillance systems for Sydney's Waratah train fleet.
- ↘ Advanced military aerospace, avionics and mission management systems.
- ↘ World-class capabilities in refurbishment and maintenance, modification, upgrade and support for specialist vehicles and equipment.

# WHENEVER CRITICAL DECISIONS NEED TO BE MADE THALES HAS A ROLE TO PLAY

## DEFENCE

Thales solutions meet the growing demand from governments for integration of defence and security forces, in traditional defence environments and across the emerging environments of urban combat and cyber warfare.

Thales works in partnership to support Australia's and New Zealand's armed forces in accomplishing their missions and securing their strategic position in the region's defence networks.

Our commitment is to provide solutions and systems, equipment and services which offer the interoperability and scalability needed for deployed forces to gain and maintain decision-making and operational superiority under all circumstances.

## SECURITY

Working with our customers, Thales develops integrated, resilient solutions which help governments, security agencies and critical industries protect citizens and places, sensitive data and assets.

Thales's areas of strength include data-encryption and cyber-security, border protection and customs controls, CNI and major public event security.

Our commitment is to provide customers with solutions and value-added services which enable the unhindered flow of citizens, commerce and data by ensuring the most appropriate levels of security are established, maintained and protected.

## AEROSPACE

Thales provide air traffic management solutions and systems, equipment and services to support airlines, air traffic controllers, airports and civil aviation authorities meet the challenges of growth, economic and environmental performance, safety, security and passenger comfort.

Our commitment is to provide, under extremely tight security constraints, the high performance electronic systems and IT solutions that crews and air traffic controllers need to master any situation and take the right decisions at the right time.

## TRANSPORTATION

Thales transport solutions enable passenger and freight rail operators to get the most out of their infrastructure.

Thales works with governments, operators and industry partners to master the growing complexity of transport networks, and provide services that improve interoperability, enhance passengers' experiences and make the transportation of goods more efficient.

Our commitment is to provide our customers with the technological solutions and services they need to operate their infrastructures safely at higher capacities and greater efficiency, allowing passengers and goods to get to their destinations more quickly and at lower cost.
